

UX design manager with core strengths in DesignOps, practice building, platform strategy around communications, and change management. Over 18 months I moved from content designer to DesignOps to manager, then rebuilt the content design team from 1 to 12 and turned ticket-taking writers into design partners. Now I lead 12 designers across two products, one platform, and the multimedia practice.

CORE SKILLS

UX strategy and roadmaps

People management and coaching

Content design

Content strategy

DesignOps

AI feature design and governance

Design systems adoption

Product analytics

Stakeholder influence

Cross-functional leadership

TOOLS

Heap

Pendo

UMUX surveys

Figma (review, feedback, editing)

Copilot

Claude

EDUCATION

University of Notre Dame

BBA, Marketing & Psychology

Magna cum laude, 3.7 GPA

Varsity letters, football & rowing

EXPERIENCE

Paychex

2019 – 2026

From 2020 to 2026, I've led UX on products that have earned 8 industry awards. Most notably, Paychex Voice Assist won Brandon Hall Gold in "AI for business impact."

UX design manager, product design

Mar 2024 – Jun 2026

- › Led 12 designers across three product platforms and the multimedia practice. Managed both the work and the people delivering it.
- › Owned four portfolios at once: Taxes and Payments (each spanning two customer platforms), the accountant platform and its design system, and the multimedia team supporting 25+ products across all three platforms.
- › Secured earlier UX involvement in roadmap planning. Guided the team in building a Claude-based AI agent that compressed 6 weeks of discovery across two separate projects into 3 days.
- › Facilitated content ownership standards, messaging guidelines, and governance for LLM-based AI features across dozens of products. Increased Paychex Flex Assistant accuracy on key topics from 70% to 90%.
- › Built UI Writing Assistant, a Microsoft Copilot agent. This enabled product designers and partners to draft their own high-quality application messaging, freeing up over 100 hours of content design resourcing each week.
- › Led UX on a range of AI-feature initiatives, including Paychex Assistant (chatbot), SundaySky (video), and Payroll Voice Assist (voice). Guided creation of a human-in-the-loop process for AI-authored Help articles.
- › Used Heap, Pendo, and UMUX data to evaluate post-launch performance, identify friction points, and recommend roadmap adjustments.
- › Brought the multimedia team through a four-phase transformation: eliminated low-value work, surfaced the team's strategic value, scaled it, and shifted the culture.
- › Advised design system leadership on adoption strategy across 90 designs and 100+ product teams.

UX design manager, content design practice

Jun 2021 – Mar 2024

- › Built a content design practice from scratch, growing from 1 team member to 12 employees plus a full-time contractor, supporting 40 to 50 product designers across 100+ dev teams.
- › Hired 11 people and personally trained 9 with no prior content design experience.
- › Team outcomes: 75% promotion rate, 92% retention (average tenure 3 years), and 100% of direct reports proactively offered recommendations when I left.

**Paychex**

2019 – 2026

**UX design manager, content design practice**

continued

- › Managed all in-app messaging requests from across the business, including notifications, pop-ups, banners, and other UI text. Evaluated each against CX standards, prioritized by impact, and oversaw execution.
- › Redirected disruptive partner requests toward contextually embedded alternatives. When piloted, those solutions lifted KPIs by 2.5x against baseline.
- › Pioneered the test-and-learn process at Paychex, driving user and business value through regular experiments and A/B tests to improve workflows and generate revenue.
- › Established the scale, alignment, and leadership for the team to graduate to a federated reporting structure and operate as a community of practice. Positioned a design-lead-level senior content designer to lead it.

**UX design operations specialist**

Aug 2020 – May 2021

- › Defined requirements for technical enhancements, overhauled the intake process, and managed delivery across dozens of products.
- › Led content work triage and prioritization across all product teams, balancing the needs of dozens of stakeholders with the user experience impacts of over-messaging.
- › Burned down a 6-month content backlog in 2 months by reorganizing the work and cutting low-value requests.

**UX content designer**

Sep 2019 – Jul 2020

- › Within 45 days of hire, volunteered to drive the team's Help Center deployment, organizing the work, defining the process, and monitoring completion.
- › Owned all UI content and documentation for the PPP loan calculator, helping 500,000 small businesses secure \$65B in funding and earning a Silver Stevie Award.

**Xerox Corporation**

2007 – 2018

**Program manager, corporate communications**

2014 – 2018

- › During the 2016 separation of Xerox (\$10.8B) and Conduent (\$6.7B), led change management for 140,000 employees across 180 countries.
- › Product-managed intranet UX for two Fortune 500 companies. Overhauled IA, content governance, and structure, eliminating \$125K in recurring annual overhead.
- › Authored global corporate narrative and strategy deck for Direction 2016 with direct CEO input. Supported executive and shareholder communications.

*Previously held roles in social marketing, program management, and operations at Xerox (2007 – 2014).*
